

Junior Mechanical Engineer

The Opportunity:

Under the direction of the Senior Project Engineer or the Project Manager, the Junior Mechanical Engineer is responsible for the managing and successful completion of assigned projects to the standard of both Grey Owl Engineering and our clients. Assignments are designed to further develop judgement and understanding of professional and ethical responsibilities. This role requires an understanding of facility / mechanical design and construction / fabrication practices.

What you will be doing while you are here:

- Preparation and review of engineering project deliverables including:
 - Calculations required to size and spec piping, controls and equipment
 - Data sheets
 - Engineering reports (PMP's, DBM's, Scoping Documents, technical reports)
 - Project specifications
 - Drawings (P&ID's, Plot Plans, Isometrics, Piping Plans, etc.)
- Support to the Procurement team in the requisitions of contractors, materials, and other services during cost estimates, RFQ process, bid review and purchasing
- Support to the Document Control team during document development and client submission
- Support to the Project Control team in the development of cost estimates, project schedules, and progress reports
- Support company HSE initiatives
- Other junior engineering duties as assigned

If you have these, we would like to hear from you:

- Mechanical Engineering Degree from an accredited university
 - Experience working in the oil and gas industry in North America is considered an asset
 - Experience working in an EPCM environment is considered an asset
 - Professional engineering registered or eligible for registry with APEGA
 - Comprehensive working knowledge of Microsoft Office products
 - General understanding of the applicable regulatory codes and standards
 - Strong analytical thinking, negotiating and problem solving skills
 - Strong organizational, planning and time management skills
 - Strong communication skills: verbal, business writing, electronic communications and presentations
-

This position will be working in the Grey Owl Engineering Calgary office. Travel to meeting and client sites in western Canada may be required.

Why Grey Owl Engineering?

Our Company is committed to providing an environment where we enable you to engage with our industry leading clients on a variety of capital and operating projects and be a key contributor to the success and growth of the Company. We help you be the best professional you can be in our services and industries.

What we bring to the table:

- Competitive compensation packages
- Flexible working environment
- Benefits packages which includes Medical, Dental and Life
- Fast-paced, fun and collaborative environment
- A team invested in you both personally and professionally

If this feels like a great fit please forward your **resume and cover letter** to careers@greyowleng.com

Applications that do not have a cover letter will not be considered. Please include within your cover letter details about a school project that will be directly relevant to this role.

We thank all those that apply, however only those considered for an interview will be contacted.
